
API TRAINING

Deep in the heart of Texas

April 7-11, 2003
Austin, Texas

Training will be held in the Capitol complex just north of downtown.

Convenient transportation to/from Austin Bergstrom Airport
Walking distance from downtown hotels and restaurants

Course Overview

From the SIRSI Customer Service website:

The Unicorn API Training Course is designed to teach participants how to interact directly with Unicorn Databases.

- Use Unicorn SERF tools for database manipulation
- Create custom reports
- Use and understand Unicorn workstation transactions and APIserver
- Customize iBistro/iLink
- Import and export bibliographic, authority, user and other records

Prerequisite: Unicorn Basic System Administration; Unicorn Advanced System Administration; Basic knowledge of PERL scripting and HTML; Knowledge of the Unicorn application is highly recommended.

Audience: Unicorn administrators with Perl scripting skills who need reporting or data modification choices not available through delivered Unicorn software

Class size: Minimum number of participants is 5, maximum is 10.
